CORE SKILLS

Astro | TypeScript | Tailwind CSS | Node.js | React | PostgreSQL | Bun | Zod | CI/CD | Open Source | Zero-Config Portfolios | Automated Artifacts | Client Automation | Schema Validation | Multi-Language Output | Dark Mode | Open Source Contributor | Continuous Learning | Project Leadership

PROFESSIONAL EXPERIENCE

Creator & Lead Developer | Devsync

01/24 - Present

Building an open-source ecosystem that generates professional portfolios from a single JSON configuration.

- **Zero-Config Portfolios:** Users can generate a production-ready multilingual portfolio in under 2 minutes with a single CLI command.
- **Automated Artifacts:** CI pipeline auto-generates CV, README, and LinkedIn assets on every DEVSYNC.json push.

Full-Stack Developer | Freelance

06/22 - 12/23

Delivered custom web applications and automation tools for startups and small businesses.

- **Client Automation:** Built internal tools that reduced manual reporting time by 70% for 3+ clients.

PROJECTS

Devsync CLI

The core CLI tool that scaffolds, validates, and builds Devsync portfolios from DEVSYNC.json.

- **Schema Validation:** Zod-based validation ensures every portfolio meets strict data contracts before build.
- **Multi-Language Output:** Generates fully localized static sites with prefix-based routing and automatic redirects.

npm: <https://npmjs.com/package/@jannael/devsync>

Portfolio Template

The default Astro template shipped with Devsync — responsive, accessible, and SEO-optimized out of the box.

- **Dark Mode:** System-preference aware theme toggle with localStorage persistence and smooth transitions.

EDUCATION

Computer Science & Software Engineering | Self-Taught Developer 2020 - Present

- **Open Source Contributor:** Built and maintained multiple public projects, learning through real-world shipping and community feedback.
- **Continuous Learning:** Focused on modern web stack: Astro, TypeScript, Tailwind, and developer tooling.

CERTIFICATIONS

Open Source Maintainer

Credential <https://github.com/jannael/devsync>

- **Project Leadership:** Validates ability to design, document, and maintain a public developer tool used by the community.
